### Notes

\* Drain pineapple and SAVE PINEAPPLE JUICE for cold liquid in recipe above (cold liquid should equal the same amount as the first water listed above, which will be the hot water in the recipe).

Any amount of P/A juice drained plus water added to equal the total cold liquid is okay; in other words, use up all the drained juice and add water to get the correct volume.

Bring the first volume of water in the recipe to a boil and pour over gelatin. Stir until dissolved.

Add drained P/A juice with just enough water added to equal same volume as first (hot) water in the recipe. Put the P/A-water mixture to the dissolved gelatin. Stir. Chill while preparing vegetable.

Grate carrots and dice celery and mix with drained pineapple. Place fruit and vegetables in 2 counter pans 12X20X2 inches (for 50 servings; cut each pan 5X5 or 4X6 when set).

Pour 1/2 of cooled gelatin liquid over fruit and vegetables in each pan. Place in refrigerator to congeal for next day service.

Each serving will be ~3/4 cup to = 1/4 cup gelatin and 1/2 cup fruit/vegetable = 1 fruit/vegetable serving.
